

KEYPLAN

Note:
 This map shows the potential scale of flood inundation for a range of severe overtopping flood events and different standards of flood defence. They do not include the impact of a breach or failure of these defences.

Typical range of defence standards for the River Don and Deane is to protect up to a 1 in 30year (3%) return period.

s2 = 1 in 2year Standard of Defence
 q1000 = 1 in 1000year or 0.1% probability flood event.

This map should be considered in support of the Environment Agency Flood Zone Maps to aid the Sequential and Exception Tests.

It should not be considered in isolation without reference to the other SFRA Flood Risk Maps.

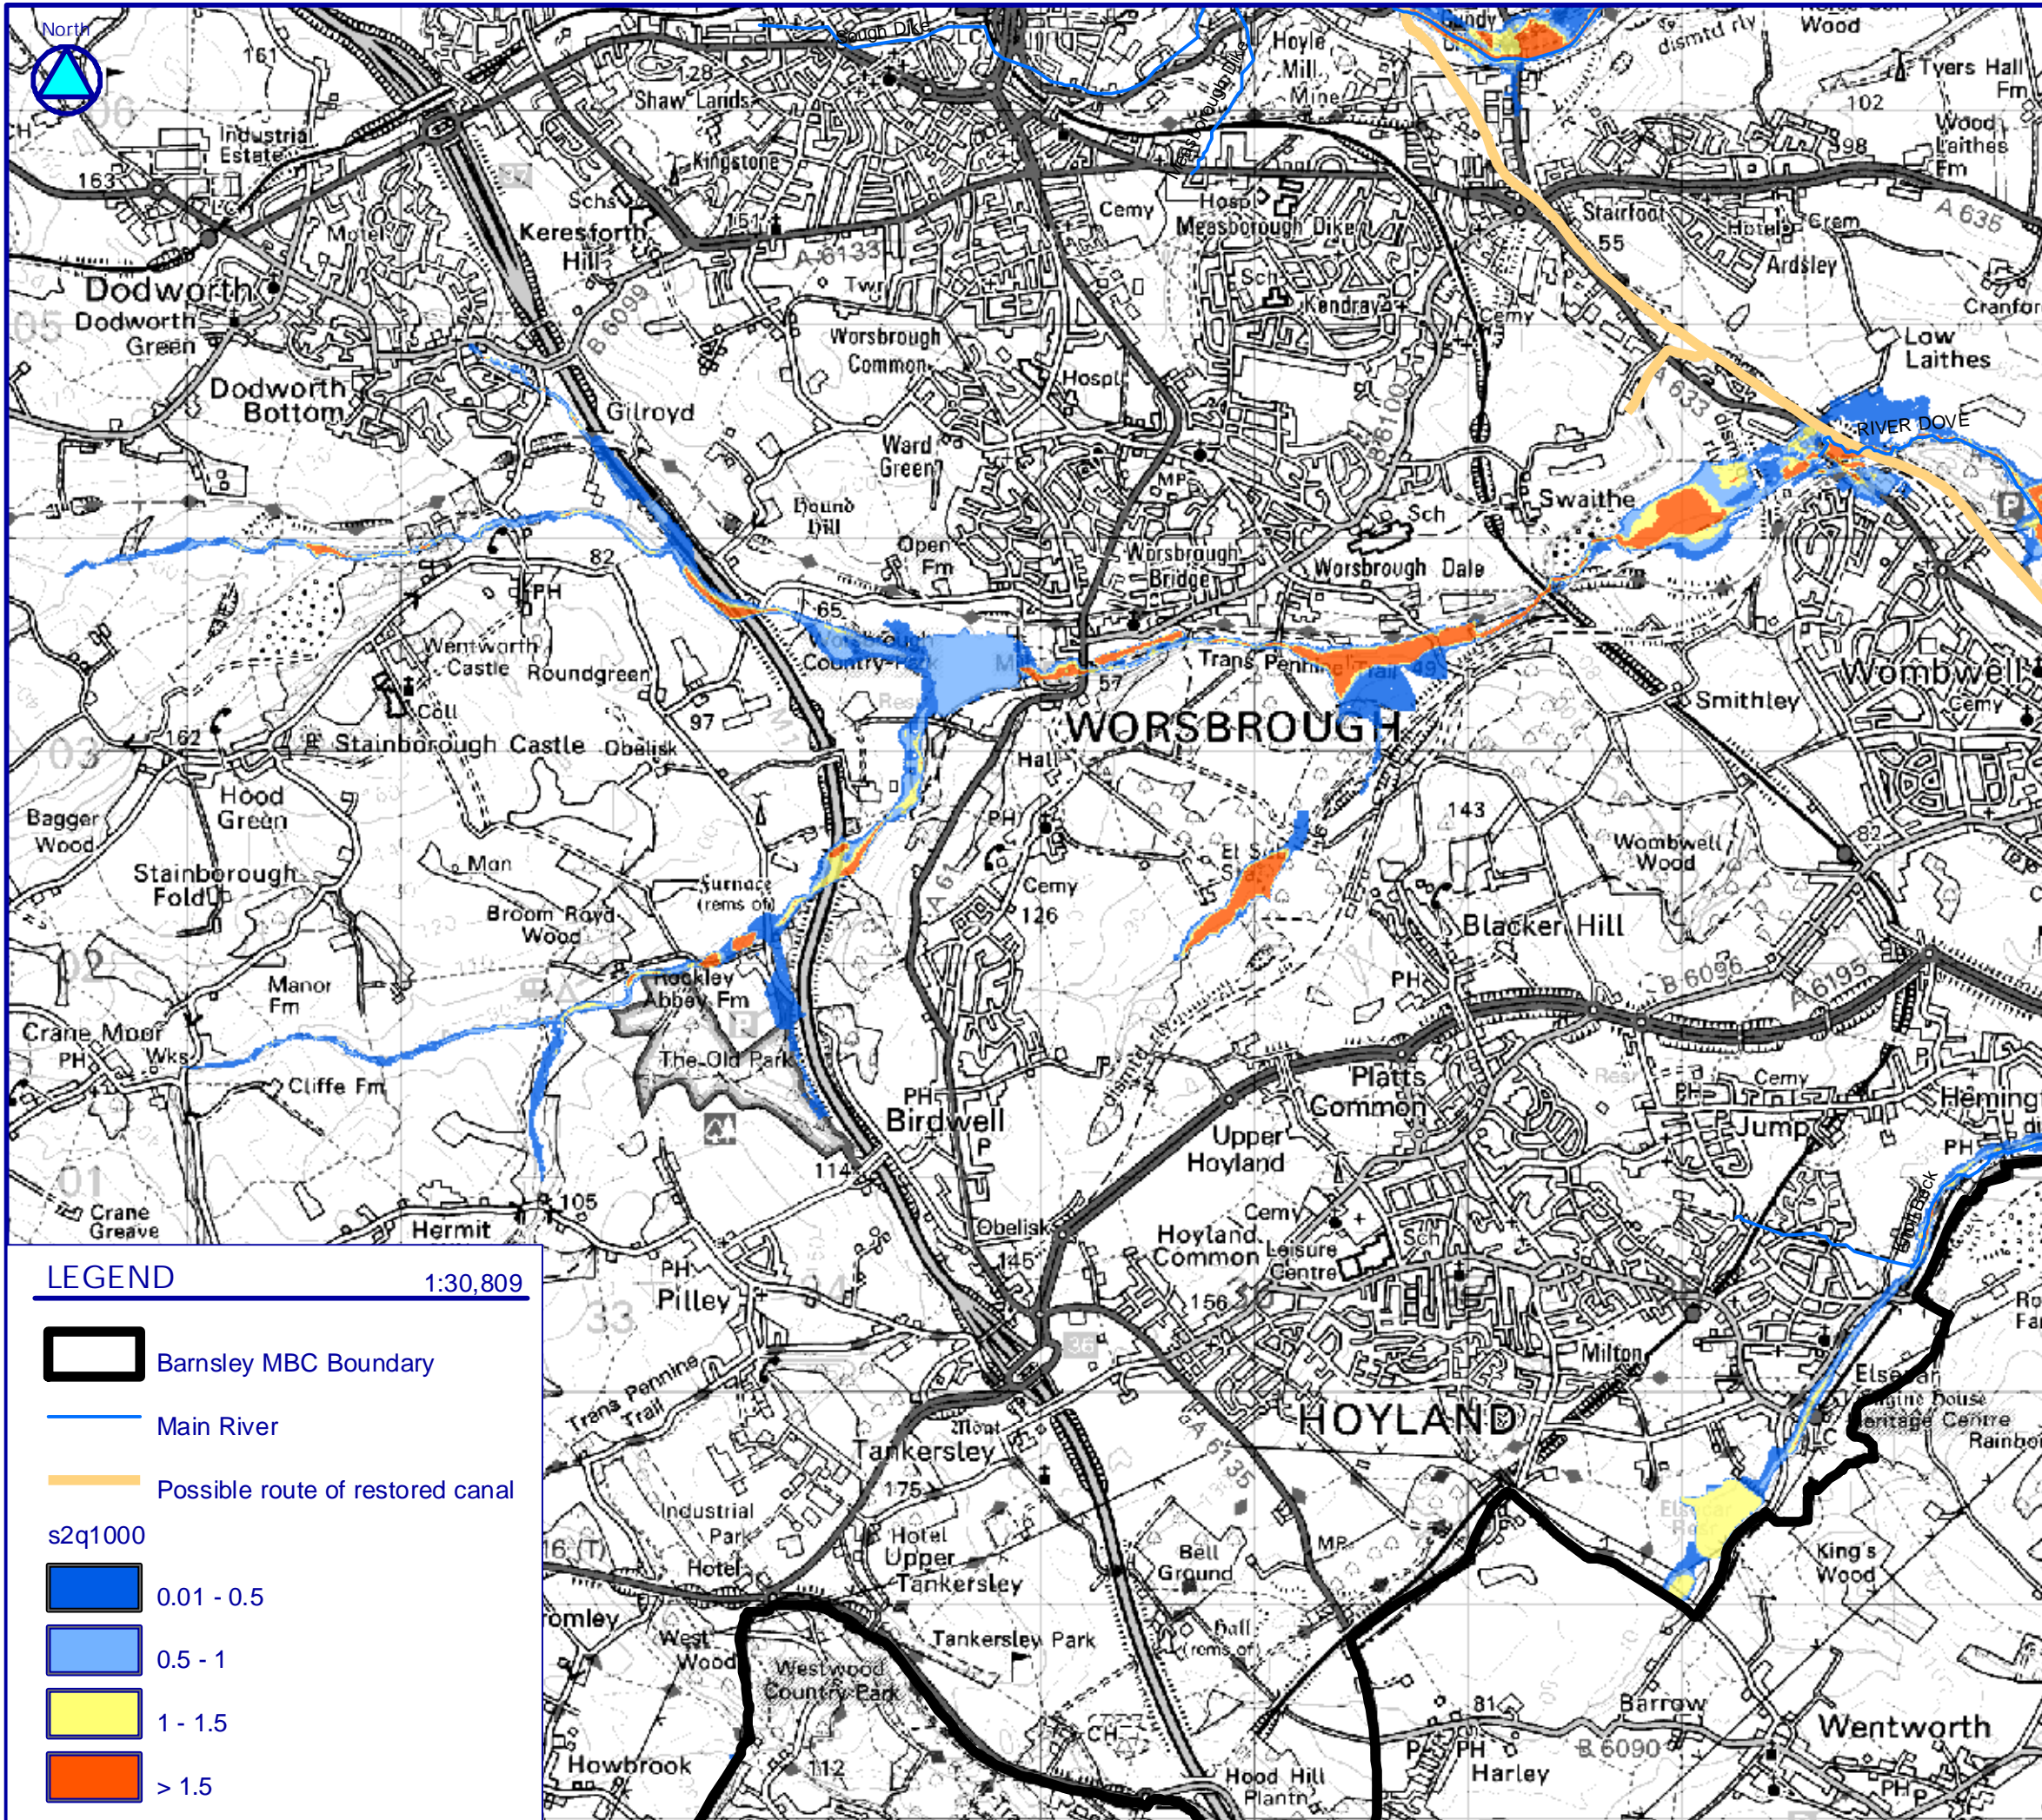

Please see the Section 6 of the SFRA for further details.
